

TELECOM EXPENSE MANAGED SERVICES

SAVING MONEY BEGINS WITH UTR.

UTR HAS ALWAYS SAID THAT, “you shouldn’t have to spend millions of dollars to manage millions of dollars.” Some companies just don’t get it, but we sure do!

Our managed services will not only deliver on your telecommunications management needs but fit within your budget as well. Using FTS – Financial Telemanagement System a web based TEM tool - will put you in immediate control over your expenses and assets.

No license fees, low cost of entry, no risk and a 30 day service turn-up are just a few of the reasons that can justify your decision to use UTR to help with the organization, reconciliation, allocation and processing of your company’s telecommunications vendor invoices.

Here are some more:

Scalability. Start off with managing your vendor bills and grow into asset management or call processing or service orders. FTS handles it all within one structure. Pay for only what you use.

Expertise. Whether your needs are bill auditing / reconciliation / processing, business process development, systems

interfacing, software development or just plain old problem solving, UTR has the experience to deliver the desired result.

Flexibility. You pick your services, you pick your involvement and you pick your term. We believe good work will be rewarded with more work!

Software. Bill reconciliation, cost allocation, invoice processing, data file extracts, reporting, dashboards, call usage, service order desk, asset control, trouble desk can be used as single solu-

vides a series of vendor bill management reporting on what reconciled and what didn’t. Also we provide a full compliment of reports linking vendor expense to company hierarchy for cost center spend analysis etc. If we are missing a report, we will give it to you!

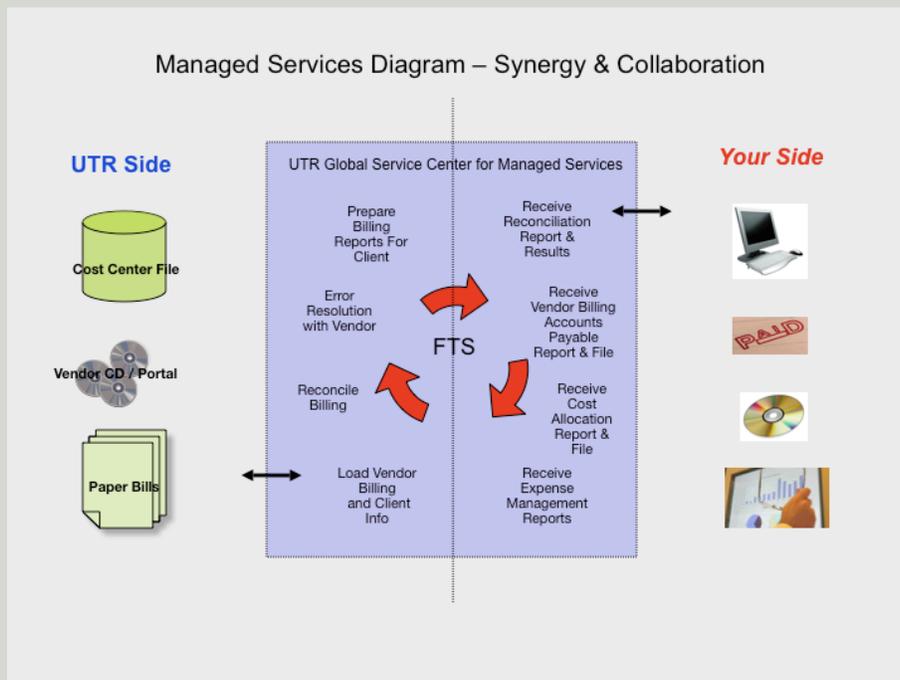

Files. FTS provides an Accounts Payable file for all vendors and account numbers / BTNs. FTS also provides a Cost Allocation file for charge-back of expense. What ever file and format your company needs, we will provide it!

Service. Our “Customer-First” attitude will provide you with the services your organization needs to support your telecommunications management efforts. Our service commitment can be scaled based on your needs.

Getting started is easy. UTR requires a copy of your vendor bills, company cost center and GL file and a 1 hour planning meeting. Within 30 days you will be using FTS to better reconcile vendor bills, report on expense by vendor and

corporate user and allocate expenses to cost centers and GL codes.
