

UTR - Translating Information Into Value

Telecom, AP, Cost Center Managers & Finance

Bringing your departments together to better understand and manage your telecom expenses and assets.

UTR provides a centralized solution to manage all of your telecom and desktop / IT assets and expenses. Offered as a managed service, ASP or within a software license model, UTR will provide end-to-end digitization of your company's provisioning, asset management and invoice processing; lowering current operations costs, reducing vendor bill spend and creating a bridge between your company information and the vendor billing. Our approach is to first get billing correct and continuously managed, next tackle inventory management problems and finish off with a centralized service order process - linking the **financials** to the **assets** and to the **operations**.

Our core services include:

- ➔ **Vendor Bill Audit** - Getting the Vendor Bill Right - Refunds and Savings.
- ➔ **Physical Inventory** - Knowing What You Have and Who's Got It.
- ➔ **TEM Management** - Monthly Bill Management - Centralize, Reconcile, Allocate and Report.
- ➔ **Wireless Management** - Manage the Variance between Plan and Actual Costs.
- ➔ **Call Accounting** - Process and Report on Usage for Voice, Wireless VoIP, IPDR Traffic.

What can we do for you today? All of our core services are designed to reduce your spend on telecom and turn information into value. Please contact Donald Murphy at 201-567-6060 or by email dmurphy@utrglobal.com.
